ADSP
protein sequence analysis 451
AGE
analysis of gene evolution 5
AIDS incidence
reporting delay distribution, integral equation models 579
Alignment algorithm
protein sequence analysis, DOT matrix 529
Alignment editor
sequence analysis, MALIGNED 535
AliMac
protein sequence alignment, C 49
Amino acid sequence
construction of phylogenetic tree, MacT 591
ANAGEL
DNA fragment length analysis, agarose gel 524
Analysis of context
subclass method, mRNA precursors 367
APL program
heat process evaluation, Crank–Nicholson method 549
Artificial intelligence
biological systems, Knowledge Base 113
Atari ST
sequence analysis, GFA-BASIC 75
Augustinsson plots
limitations of, enzyme kinetics 475

BASIC
ecosystem pathways, Macintosh 267
PCR primer design 193
word counts in random text, Markov chain 433
BIOSITE
protein sequence interactive comparison 71
Blast output
parser, Btab 601
Branching process model
PCR 65
Btab
Blast output parser, sequence database 601

C
multiple sequence alignment, CLUSTAL V 189
Object-oriented database software, Unix 227
oligonucleotide directed mutagenesis, IBM 425
parsing tool, GBPARSE 407
protein sequence alignment, AliMac 49
protein sequence analysis, VAX/VMS 451
protein sequence mutation data matrices, MAKEPET 275
sequence alignment 481
sequence analysis, IBM 129
sequence analysis, MuSCo 57
sequence analysis, Sun SparcServer 461
sequence comparison, Sun workstation 511
C++
object-oriented modelling of cell regulation, IBM 443
CD-ROM
DNA database search, EMBLSCAN 137
cDNA
sequence analysis, C 461
Cell regulation
object-oriented modelling, METASIM 443
Chull.sas
SAS macro 409
Cloning vector
database system 79
CLUSTAL V
multiple sequence alignment, C 189
CMAP
contig mapping, VAX/VMS 467
CompoundKB
intermediary metabolism knowledge base 347
COMPSEQ
large-scale nucleotide sequence analysis 595
Consensus matrix
Turbo C, multiple alignment 339
Contig mapping
chromosome reconstruction, CMAP 467
Convex hull
SAS macro, Chull.sas 409
Coordinate estimation
restriction map, Genstat 5 539
CSTATUS
DNA sequencing software 291
Cyanobacteria
graphics utility program, MIGS 605

Database
genomic map data, GeneScape 563
human genome mapping, Unix 149
sequence searching, PATMAT 249
Database management
molecular biology 311
Database search
sequence pattern matching 377
Database searching
natural sequence code 283
Database system
cloning vector, VECTOR-PC 79
DataMinder
molecular biology management tool, Macintosh 107
DIROM
oligonucleotide directed mutagenesis 425
DNA
database search, EMBLSCAN 137
fragment length analysis, agarose gel, ANAGEL 524
sequence comparison, filtration methods 121
sequence database, GenBank 199
DNA sequence analysis
Atari ST 75
hybridization method 569
Markov chain, BASIC 433
open reading frame 521
DNA–protein interaction
linear packing, one-dimensional grid 323
DNA Aligner
phylogenetic analysis, Macintosh 177
DNA sequencing
data analysis software 291
file exchange 195
DNA Translator
phylogenetic analysis, Macintosh 177
DNABIND
nucleotide sequence searching, IBM 401
DOT matrix
protein sequence analysis, alignment algorithm 529

Ecology
field data analysis software, IBM 587
Ecosystem pathways
carbon transfer, Macintosh 267
Educational software
PEDIGREE, SEGREGATION, transmission genetics 603
Electron microscopy
image-processing software 583
EMBLSCAN
DNA database search, CD-ROM 137
Enzyme kinetics
limitations of Augustinsson plots 475
Michaelis–Menten equation, time correction 575

FASTA
sequence alignment, C 481
Field data analysis
software, IBM 587
File exchange
DNA sequencing data 195
Filtration methods
DNA sequence comparison 121
Finite-difference model
bacterial film solute diffusion, Quick BASIC 489
FORTRAN
PCR analysis 65
RNA secondary structure, probability profiles 389
sequence analysis, VAX/VMS 535
FORTRAN 77
DNA database search 137
one-dimensional grid, linear packing 323
probit analysis 209
protein structure 1
RNA sequence analysis 15
RNAKNOT, pseudoknot prediction 243
sequence analysis 57
sequence comparison, VAX/VMS 35
tree edit algorithm, VAX/VMS 215
VAX/VMS, artificial neural networks 39
VAX/VMS, sequence alignment 501
Fractal geometry
applications in biology, models, complexity 359
Funct G
radial distribution function, cluster analysis in cell biology 307

GBPARSE
GenBank parsing tool, C 407
GCWIND
DNA open reading frame, sequence analysis 521
GenBank
flat-file parsing tool 407
sequence database DNA, new entries 199
Gene design
oligonucleotide directed mutagenesis 425
GeneScape
relational database, genomic map data, Macintosh 563
Genetic linkage
parallel processing, Unix workstations 141
Genome
Object-oriented database software 227
Genstat 5
restriction map coordinate estimation, microVAX 539
GEOSEQ
sequence alignment, statistical geometry 385
GFA-BASIC
sequence analysis, Atari ST 75

GLOBIC
nucleotide sequence analysis, IBM 29
Graphics utility program
MIGS, Quick BASIC 605
Growth curves
Gompertz function 239

Heat process evaluation
for spherical foods, APL program 549
Human genome
database searching, natural sequence code 283
online service 149
Hybridization method
DNA sequence analysis 569
Hypercard
molecular biology management tool, DataMinder 107
HyperPCR
PCR optimal annealing temperature 83

IBIS
integrated biological imaging system, electron micrograph image-processing 583
IBM
DNA fragment length analysis, ANAGEL 524
epidemiology data analysis 97
field data analysis software 587
nucleotide sequence analysis 129
Pascal, analysis of gene evolution 5
protein sequence analysis 185
protein sequence interactive comparison 71
sequence analysis, Turbo Basic 29
sequence searching, PATMAT 249
spectrum analysis, MULTI 81
IDENTITY
protein sequence alignment, Turbo BASIC 261
Image-processing
electron micrograph, IBIS 583
Information resource
molecular biology database management 311
Integral equation models
AIDS incidence, reporting delay distribution 579
Interactive Matrix Language
Cox's proportional hazards regression model 23
Intermediary metabolism
knowledge base, CompoundKB 347

Knowledge base
artificial intelligence, biological systems 113
intermediary metabolism, CompoundKB 347

Linda
genetic linkage analysis, parallel processing 141
Linear packing
one-dimensional grid, FORTRAN 77 323
LOAD
DNA sequencing software 291

Macintosh
molecular biology management tool, DataMinder 107
phylogenetic analysis, Hypercard 177
relational database, GeneScape 563
Macintosh Hypercard
PCR, HyperPCR 83
MacT
construction of phylogenetic tree, Quick BASIC 591
MAKEPET
mutation data matrices, C 275

MALIGNED
multiple alignment editor, sequence analysis 535
Markov chain
DNA, word counts in random text 433
MATCH-BOX
protein sequence alignment, FORTRAN 77 501
METASIM
object-oriented modelling of cell regulation 443
Michaelis–Menten equation
limitations of Augustinsson plots 475
time correction for enzyme kinetics 575
MicroVAX
FORTRAN 77, protein structure 1
MIGS
miscellaneous image generation system, graphics utility program, Quick BASIC 605
MISMATCH
PCR primer design, BASIC 193
Models
fractal geometry, applications in biology 359
Molecular biology
database management, information resource 311
DataMinder, Hypercard 107
Molecular evolution
analysis of gene evolution 5
MOMENT
protein sequence analysis, IBM 185
mRNA precursors
analysis of context of splice site signals, mRNA precursors 367
MULTI
spectrum analysis 81
MULTICOMP
sequence comparison, FORTRAN 77 35
Multiple alignment
consensus matrix 339
MuSCo
sequence analysis, common patterns 57

Natural sequence code
human genome database searching 283
Neural networks
artificial, protein clustering 39
Neuroblastoma
epidemiology data analysis 97
Nucleic acids
gene design, DIROM 425
Nucleotide
large-scale sequence analysis, COMPSEQ 595

Object-oriented database
Escherichia coli genome 227
Object-oriented modelling
cell regulation, METASIM 443
OBSTRUCT
protein sequence analysis, similarity level, structural resolution 599
Open reading frame
sequence analysis, GCWIND 521
Ordinal response data
cumulative logit model, SAS program 555
Overseer
nucleotide sequence search 45

Parallel computation
machine independent, sequence comparison 167
Parallel computer
sequence pattern matching, database search 377
Parallel processing
genetic linkage analysis, Linda 141
protein sequence alignment, AliMac 49
Parsing tool
GenBank flat-file 407
Pascal
analysis of gene evolution 5
nucleotide sequence search 45
statistical geometry, sequence alignment 385
PATMAT
sequence searching, IBM 249
Pattern matching
sequence database search, parallel computer 377
PCR
analysis with internal controls, branching process model 65
optimal annealing temperature, Macintosh Hypercard 83
primer design, MISMATCH 193
PEDIGREE
educational software, transmission genetics 603
Phylogenetic analysis
sequence analysis, Macintosh 177
Phylogenetic tree
amino acid sequence, MacT 591
Probability profiles
RNA secondary structure, FORTRAN 389
Probit analysis
mosquito control, FORTRAN 77 209
PROFILEGRAPH
protein sequence analysis, graphical tool 331
Protein
clustering, artificial neural networks 39
Protein sequence
alignment, IDENTITY 261
alignment, MATCH-BOX 501
alignment, parallel processing, AliMac 49
hydrophobic moments, MOMENT 185
interactive comparison, BIOSITE 71
mutation data matrices, MAKEPET 275
Protein sequence analysis
ADSP 451
alignment algorithm 529
Atari ST 75
graphical tool 331
region delineation 255
SERPENT 295
similarity level, structural resolution 599
Protein structure
antibody binding site 1

Quick BASIC
cluster analysis, Funct G 307
IBM, finite-difference model 489
reference citation search 196

Radial distribution function
cluster analysis in cell biology 307
Rdb
contig mapping, VAX/VMS 467
REF-LIST
reference citation search, Quick BASIC 196
Regression model
Cox's proportional hazards, survival curves 23
Restriction map
fragment length, coordinate estimation, Genstat 5 539
sequence comparison, C 511

RNA
pseudoknot prediction, RNAKNOT 243
secondary structure, probability profiles 389
sequence analysis, FORTRAN 77 15
tree edit algorithm, secondary structure 215
RNAKNOT
RNA pseudoknot prediction, FORTRAN 77 243

SAS macro
Chull.sas, convex hull of sets of points 409
SAS program
cumulative logit model for ordinal response data 555
SEGREGATION
educational software, transmission genetics 603
SEQSTAT
DNA sequencing software 291
Sequence
pattern matching, parallel computer database search 377
Sequence alignment
CLUSTAL V, C 189
FASTA, C 481
IDENTITY, Turbo BASIC 261
MATCH-BOX, FORTRAN 77 501
statistical geometry, GEOSEQ 385
Sequence analysis
ADSP, C 451
alignment algorithm, DOT matrix 529
cDNA, ICAtool 461
common patterns, MuSCo 57
DNA, hybridization method 569
dotplot 75
GLOBIC 29
local similarity, parallelization, SIM 155
Markov models, IBM 129
multiple alignment editor, MALIGNED 535
nucleotide, COMPSEQ 595
ordination 15
phylogenetic analysis, Macintosh 177
protein, OBSTRUCT 599
protein, region delineation 255
protein, SERPENT 295
Sequence comparison
filtration methods, statistical distance 121
machine independent parallel computation, C-Linda 167
MULTICOMP 35
restriction map, C 511
Sequence database
Btab, Blast output parser 601
new entries, GenBank 199
Sequence search
Overseer 45
nucleotide, DNABIND 401
SERPENT
protein sequence analysis, information storage 295
SIM
sequence analysis, local similarity 155
Solute diffusion
bacterial film, finite-difference model 489
Spectrophotometry
MULTI, spectrum analysis 81
Statistical analysis
cumulative logit model for ordinal response data 555
variance comparison between correlated samples 405
Statistical packages
measures of association, delta method 293
STATUS
DNA sequencing software 291

Subclass method
mRNA precursors, analysis of context of splice site signals 367
Survival curves
Cox's proportional hazards regression model, Interactive Matrix Language 23

Transmission genetics
educational software, PEDIGREE, SEGREGATION 603
Tree edit algorithm
RNA secondary structure, FORTRAN 77 215
Turbo BASIC
nucleotide sequence searching, DNABIND 401
protein sequence alignment, MS-DOS 261
sequence analysis 29
Turbo C
protein sequence interactive comparison 71
multiple alignment, consensus matrix 339
Turbo Pascal
DNA sequence analysis 521
graphical tool, PROFILEGRAPH 331
protein sequence analysis 185
Turbo Prolog
cloning vector database system 79

Unix
human genome mapping, online service 149
image-processing software 583
Object-oriented database software, C 227
parallel processing, genetic linkage analysis, Linda 141
sequence analysis, SIM 155

Variance comparison
between correlated samples 405
VAX/VMS
artificial neural networks, FORTRAN 77 39
chromosome reconstruction, CMAP 467
nucleotide sequence search 45
RNA sequence analysis, FORTRAN 77 15
sequence comparison, FORTRAN 77 35
tree edit algorithm, FORTRAN 77 215
VECTOR-PC
cloning vector database system 79
